

CRYONOMIC® CIC SERIES

CIC 85, 150 and 300 are also available on **wheels**

Stackable: the lid is equipped with seats for feet that permit steady stacking of containers.

All mechanical parts are **screwed** onto large threaded inserts built onto plates set in the Shell of the product.

Accessible from four sides by pallet truck and fork lift.

The hygienic **silicone packing**, easy to disassemble and reassemble, permits through cleaning even of its own seat.

A **drain hole** in the bottom to flow water of condensation and to ease cleaning

The lid opening is assisted by **gas springs**. The lid has been specifically studied so that it closes hermetically without hooking to lock.

Being **rust proof** and mounted in a protected position, the hinges, the lock and gas pistons have a practically unlimited life span!

The depth of the container at the inside is not too high, allowing every user to **easily empty** the dry ice from the bottom without problems.

The **strong and hygienic** CIC series combines the quality and hygiene of the monobloc structure in polyethylene with the use of metal components realised exclusively in stainless steel.

The containers are made with an **isolation** technique that assures a perfect attachment of the isolation with the inner and outer walls of the container. Even in contact with low temperatures of dry ice the walls will not deform.
